Experience a safer
and more open world

EDGE OF DOCK

How it works:

The ASSA ABLOY DL6010SM-In Edge of Dock features a gas spring-assisted design that enables effortless operation. The operator can smoothly lift the platform, extend the lip, and place it onto the truck bed with minimal effort. During use, the leveler's free-floating position allows it to move naturally with the vehicle, enhancing stability and reducing equipment strain. When operations are complete, a simple pull of the control rod lifts the leveler, retracts the lip, and returns it to its parking position at ramp level—ready for the next loading task.

The DL6010SM-IN meets EN 1398 requirements :

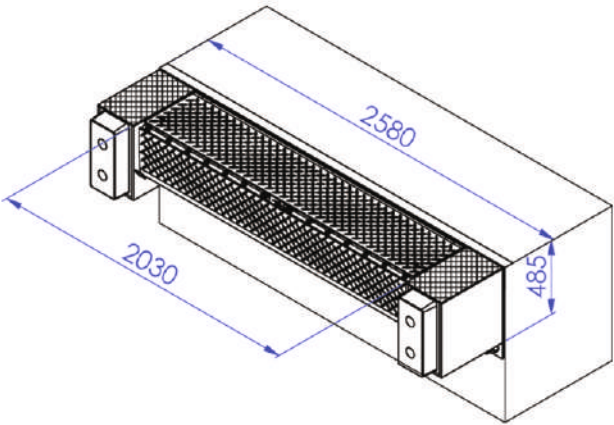

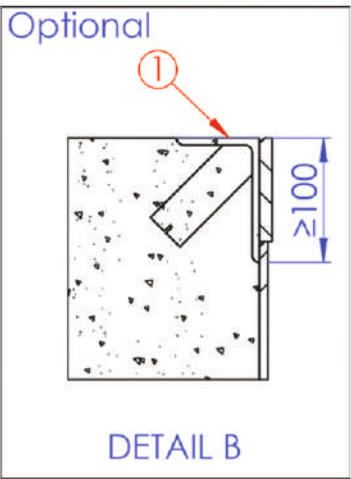

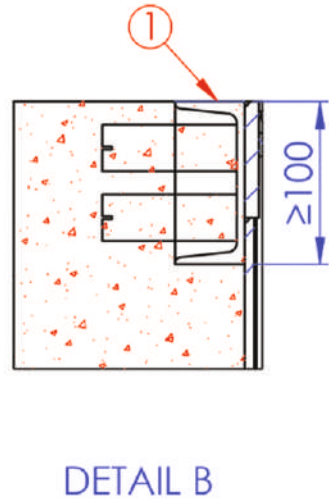

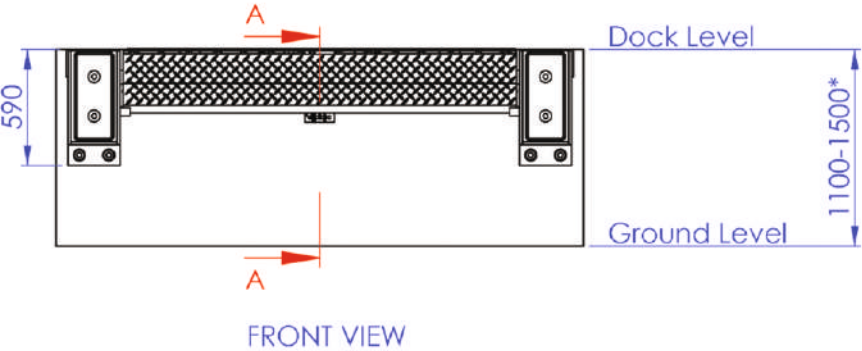

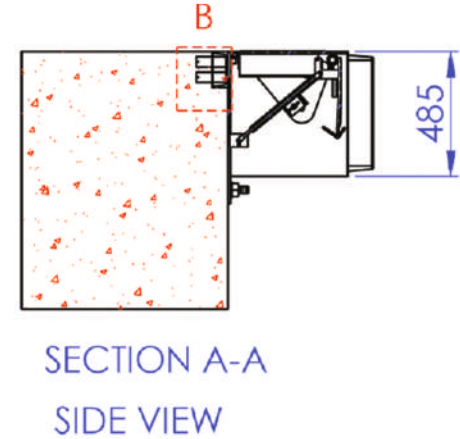

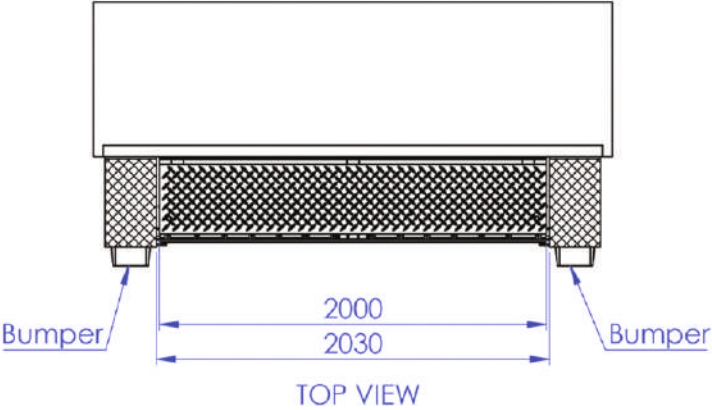

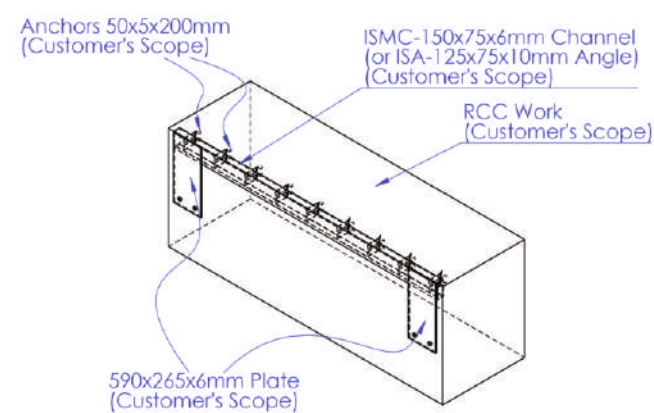

- Rated Load- The rated load is the total weight of the goods, the forklift, truck and the driver.
- The axle load is distributed across two rectangular contact areas, ensuring stability under pressure.
- DL6010SM is built to withstand dynamic loads from moving forklifts, with a capacity exceeding the rated load to ensure safety and long-term reliability in high-traffic areas.

Technical Specifications

Dimensions	Nominal Length	700 mm
	Width	2000 mm
Capacity	Load Capacity	6 tonnes (60kN)
Surface Treatment	Color options	RAL 9005- Standard paint class
	Options	Other colors available on request
Installation	Type	Ramp installation
Buffers	Standard	100 mm X 250 mm X 400 mm
