

# ICU/CCU Door ASSA ABLOY VersaMax™ 2.0 Fold

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in  
door opening solutions

Trackless design has  
never been easier

## An alternative for all your ICU door-related needs

The ASSA ABLOY VersaMax 2.0 Fold is a great alternative to traditional ICU/CCU sliding door packages offering trackless design and complete ease of use. This product solves several challenges that are encountered in typical ICU/CCU rooms.

The flexible three-panel swing/fold unit combines the benefits of both swinging and folding doors, mounted right or left side. The large clear door opening provided by the combined configuration of the fold and swing doors allows busy nurses to easily move wheelchairs, medical carts, patients and equipment. The swing door adds versatility by opening in either direction for nonlatch equipped units.

The ASSA ABLOY VersaMax 2.0 Fold features a convenient swing/ fold configuration with trackless design and full breakout in any position. Optional positive latching is available as well as a smoke seal package designed to meet the smoke infiltration aspects of UL1784. The ASSA ABLOY VersaMax 2.0 Fold is also available in a fold only variety for single slide and dual configurations.

Look to the ASSA ABLOY VersaMax 2.0 Fold when you want to maximize clear door openings in the tightest of spaces.

## Maximizing space with complete convenience

In order to get a large enough doorway to transport patients and equipment, most sliding ICU/CCU doors come equipped with a breakout feature which allows the doors to swing in one direction and be stacked. The design of the ASSA ABLOY VersaMax 2.0 Fold eliminates the need for a breakaway feature. By simply opening the bi-fold door and swing door, a wide clear doorway is instantly achieved. Beds can easily be transported without having to break open the doors. Equipment can conveniently be moved through the doorway without interference from floor tracks.

The ASSA ABLOY VersaMax 2.0 Fold provides the additional benefit of maximizing space with its unique door configuration, ensuring that hallways and hospital room entryways are not obstructed. Clear doorway openings are also maximized and vastly wider than with traditional sliding door packages.

### ASSA ABLOY VersaMax 2.0 ICU Fold features

- No floor track
- Full breakout in any position
- Easy-to-use design
- Swing/fold, single fold, dual fold configurations
