### **Congratulations on the Purchase of Your New Door!**

ASSA ABLOY Entrance Systems has developed automatic and manual doors for more than 40 years. State-of-the-art technology and carefully tested materials and components provide you with a superior product.

As with all other technical products, your manual door requires periodic maintenance and service. This manual will assist you with proper door maintenance. It is essential that you know your manual door system and that you recognize the importance of maintaining it in compliance with the applicable standards for safety.

Your local ASSA ABLOY Entrance Systems authorized representative is familiar with these standards, as well as all applicable local codes that ASSA ABLOY Entrance Systems recommends for manual pedestrian doors. Service and adjustments performed by your ASSA ABLOY Entrance Systems -authorized representative will ensure safe and proper operation of your door unit.

## **Environmental Requirements**

Please act according to your local regulations and dispose of your old product(s) and packaging properly. The correct disposal will help prevent potential negative consequences for the environment and human health.

### **Product Liability**

According to ASSA ABLOY Entrance Systems, the following are the responsibility of the owner or caretaker of the equipment:

- That the equipment operates correctly, that regular inspection and maintenance and service is made, so that it gives sufficient protection in regard to safety and health
- That the equipment is operated and regularly maintained, inspected and serviced by someone with documented competence in the equipment and in applicable regulations
- That a maintenance log is kept of inspection, maintenance and service records
- That the closing force is appropriate for the door size on fire-approved door systems (when applicable).

### Warranty

ASSA ABLOY Entrance Systems warrants its products to be free from defects in material and workmanship under intended use and service for a warranty time of 12 months, beginning at time of delivery. This warranty extends only to the original buyer of the equipment. ASSA ABLOY Entrance Systems warrants that the software will operate substantially in accordance with its functional descriptions and that it has been recorded on non-defective media.

The ASSA ABLOY Entrance Systems warranty does not apply to:

- general wear and tear on the system
- glass damage
- system deviations caused by installer other than ASSA ABLOY Entrance Systems
- system that has been altered or damaged by vandalism or misuse
- system that has been additionally equipped with non-ASSA ABLOY Entrance Systems original branded parts and/or spare parts
- unrequired visits due to poor client communication (door working when our technician arrives, reset, power discontinuation)
- adjustments (closing and opening speed) due to customer requests
- water damage
- adverse weather conditions
- any damage caused, directly or indirectly, by a circumstance beyond the control of the
  applicable company within ASSA ABLOY Entrance Systems, such as industrial dispute, fire,
  natural disaster, war, extensive military mobilization, insurrection, requisition, seizure,
  embargo, restrictions in the use of power and defects or delays in deliveries by subcontractors caused by any such circumstances.

#### **Please Note:**

- Non-compliance with manufacturer's care and maintenance recommendations may void the warranty.
- ASSA ABLOY Entrance Systems-authorized resellers shall extend this warranty to endusers only, but have no authority to extend a greater or different warranty on behalf of ASSA ABLOY Entrance Systems.
- A service agreement with ASSA ABLOY Entrance Systems will secure the availability of a fully operational system and will give priority at call-out, thus minimizing the time that the system is unfit for use.

Page 6 Issued: 8-04-2017 1016936

### Service

Regular inspections shall be made according to national regulations and product documentation by a Assa Abloy Entrance Systems trained and qualified technician. The number of service occasions should be in accordance with National requirements and product documentation. This is especially important when the installation concerns a fire-approved door or door an emergency opening function.

As with all of the technical products, manual doors need maintenance and service. It is essential to know the importance of maintenance to have a reliable and safe product.

Service and adjustments will ensure a safe and proper operation of an automatic door unit.

### What You Should Know

Be sure that an ASSA ABLOY Entrance Systems representative has provided the following for each door:

- Telephone number to call for service or questions about your system if you are uncertain of any condition or situation.
- Warranty information for each door.
- Information on how to properly use and operate the door.

Issued: 8-04-2017

### Introduction

This manual contains specific details and instructions for the maintenance and service of the ASSA ABLOY Entrance Systems VersaMax ICU/CCU Equal Panel manual sliding door package.

The door, when in use, provides smooth effortless operation when being opened and closed, and can be, broken out to provide a wider access for moving large pieces of equipment through the opening.

### Servicing Responsibility

The purpose of this manual is to familiarize you with how to have your door system serviced.

It is your responsibility, as owner or caretaker of the equipment, to inspect the operation of your door system to ensure that it is safe for use by your guests, customers or employees.

This manual provides you with a description of the operation and service requirements of your door. See "<u>Functional and Visual Inspection</u>" section of this manual. It also provides instructions for "Warranty Requirements" and "Troubleshooting" information. See <u>Warranty Requirements</u> and <u>Troubleshooting</u> sections of this manual.

Should the door fail to operate as prescribed in Safety Check, or at any other time for any other reason, do not attempt to repair or adjust the door, call a qualified service technician. These technicians are trained to service your door in accordance with applicable industry safety standards.

# **Service Availability**

ASSA ABLOY Entrance Systems products are distributed through a nationwide network of ASSA ABLOY Entrance Systems offices and authorized distributors for sales, installation and service.

Should you need service on your door system, consult the yellow pages of your telephone directory or for your local ASSA ABLOY Entrance Systems authorized distributor, call 1-866-237-2687 or visit www.assaabloyentrance.us and select Contact Us.

Page 8 Issued: 8-04-2017 1016936

# **Warranty Requirements**

To fulfill the warranty requirements and to avoid door malfunction and possible injury, the following safety checklist should be observed.

Do not use door if repairs or adjustments are necessary.

Action	If Problem Occurs
Doors have all traffic decals mounted properly	
Positive latch, if equipped, is secure and operates correctly	
Automatic Latch allows doors to break out and operate correctly	
Door area is free from hazards	99
Door panels are free from broken or cracked glass	99
Overhead track is clean and secure	99
Doors are secured to track and can not be dislodged	99
Doors slide open and closed in smooth unobstructed manner	00

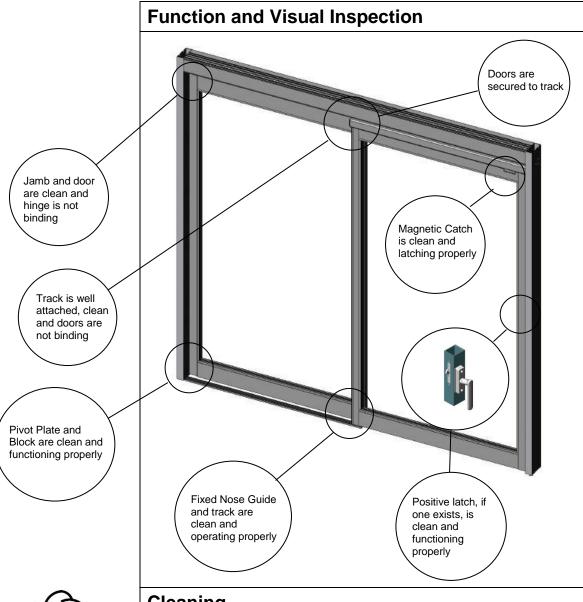

Contact ASSA ABLOY Entrance Systems authorized representative. For contact information, see last page.

Take appropriate measures

1016936 Issued: 8-04-2017 Page 9

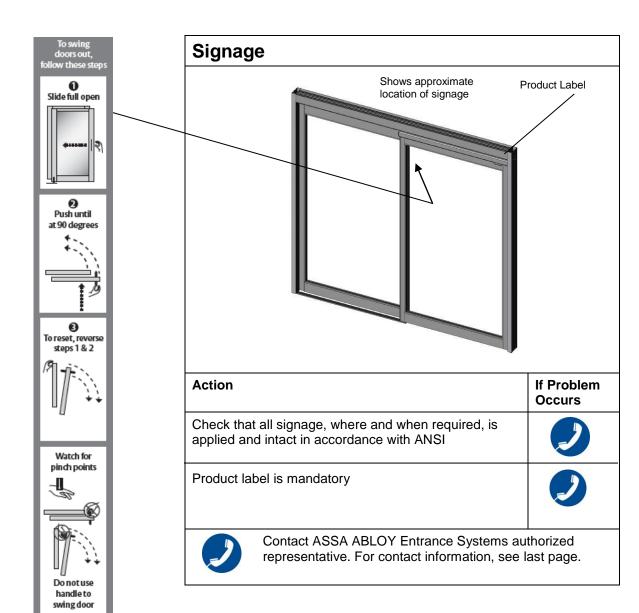

# **Cleaning**

The recommended way to clean your door is to use clean water and a sponge.

- Do not expose aluminum doors or glass windows to alkalis, or damage will occur.
- Do not clean with high-pressure water or water may enter and damage equipment.
- Do not use detergents or abrasive additives, or cleaning materials.
- Do not scrub with materials such as Scotch-brite, as this causes mechanical damage.

### Service Schedule

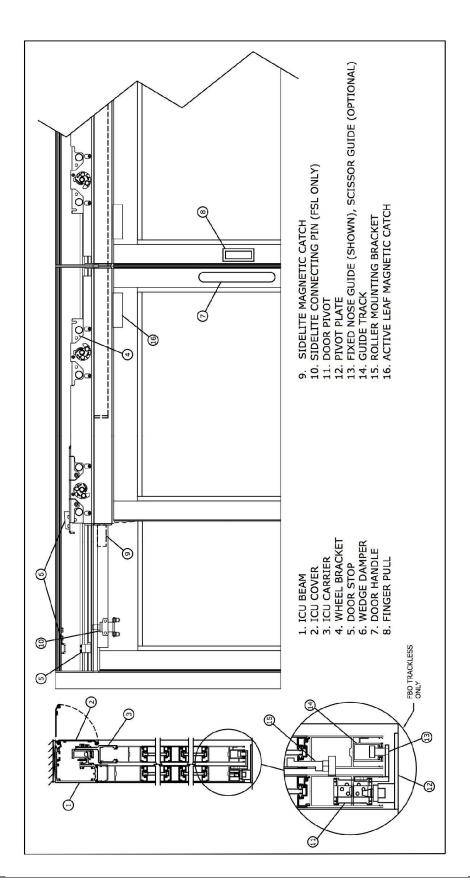

Although ASSA ABLOY Entrance Systems' door equipment has earned a reputation for world-class quality and reliability, all mechanical devices need service. Your authorized ASSA ABLOY Entrance Systems representative can offer you a Planned Maintenance Agreement on the equipment you have purchased. This agreement means the distributor will make planned maintenance calls to inspect, clean, lubricate, adjust, repair or replace worn components.

Frequency of maintenance visits will depend on factors for example, such as traffic and climate. Please ask your ASSA ABLOY Entrance Systems representative how often they recommend the following services:

- Tooth Belt
- Door Stop
- Pivot Plate
- Wedge Damper
- Carriage Wheels
- Moldings and Thresholds
- Condition of Door Frames
- Automatic Latch
- Guide Rails (if equipped)
- Anti-Static (if equipped)
- Smoke Seals (if equipped)
- Sweep (if equipped)
- Positive Latch (if equipped)

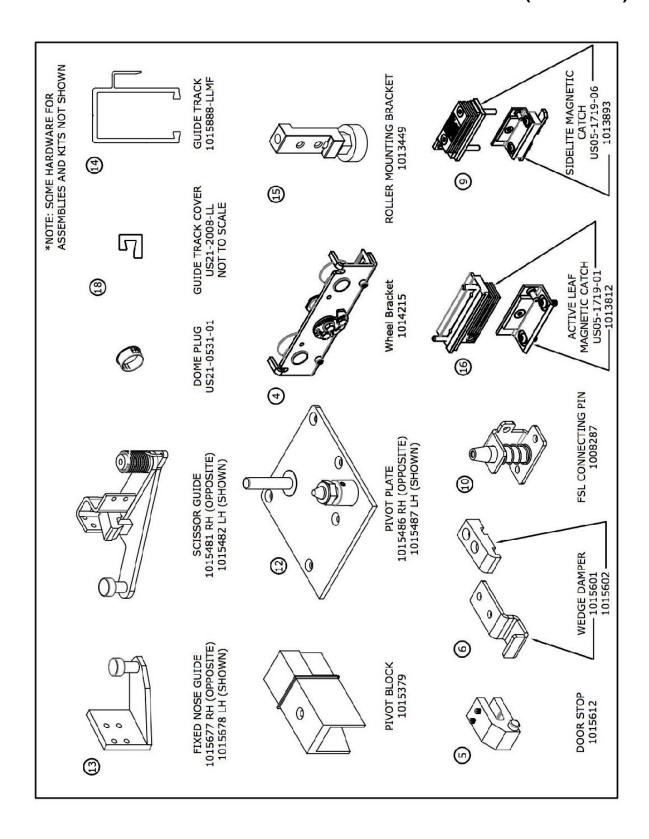

Periodic maintenance will increase the life and performance of your ASSA ABLOY Entrance Systems VersaMax ICU/CCU door system. We suggest you contact your authorized ASSA ABLOY Entrance Systems representative to discuss a Planned Maintenance Agreement. Planned Maintenance Agreements differ between ASSA ABLOY Entrance Systems representative, and ASSA ABLOY Entrance Systems has no control over the agreement each Distributor may offer.

# Parts Identification Location and Wear Parts Illustration (Continued)

1016936 Issued: 8-04-2017 Page 15

ICU/CCU panel door packages can be bi-parting (4-panel) or single slide (2 panel – left or right handed) and sidelites may be installed fixed or as full break out system. The ICU/CCU panel system utilizes an overhead concealed system.

Naming Convention	Explanation
VMS2FB0-X	Standard, Single Slide Full Breakout, OFW
VMS4FB0-X	Standard, Bi-Parting Full Breakout, OFW
VMS2FSL-X	Standard, Single Slide Fixed Sidelite, OFW
VMS4FSL-X	Standard, Bi-Parting Fixed Sidelite, OFW

# **Operational Features**

# Trackless FBO ICU/CCU Panel Packages (Patent Pending Design)

These ICU/CCU packages have the ability, when the active panel is slid to the full open position, to be fully "broken out". This feature allows the door panels to be swung fully open (Pivoting) perpendicular to the sliding motion to create a larger opening for moving oversized objects through the door opening.

### Track FBO ICU/CCU Panel Packages

These ICU/CCU packages have the ability for panels to be broken out at any position. The packages can also be slid to the full open position, to be fully "broken out". This allows the door panels to be swung fully open (pivoting) perpendicular to the sliding motion of the door to create a larger opening for moving oversized objects through the door opening.

# **Fixed Sidelite Packages**

These packages only offer the active panel to be broken out. On trackless packages, the active panel must be fully open to be "broken out". On track packages, the active panel can be "broken out" at any position.

Page 16 Issued: 8-04-2017 1016936

### **Options**

Listed below are some of the options that are offered with the ICU/CCU manual door. Please contact your local ASSA ABLOY Entrance Systems representative for a detailed description.

- Positive Latch
- Dual "C" handles
- Anti-Static system
- UL1784 smoke rated
- Concealed Sweeps
- Self Closing system
- Wedge Damper
- Cover: anodizing optional
- InteGlass™

### **Optional Features**

#### Positive Latch

An optional positive latch lock is available that will automatically latch the active leaf to the jamb when closed. A lever handle is provided on each side of the active leaf to unlock the sliding door.

### Sweep

Sweeps are available for areas where climate control or restriction of air passage is required.

### Anti-Static System

An optional Anti-Static system is available for doors that are located in areas that are predisposed to generating static electricity through pedestrian travel.

### Self Closing System

The optional Self Closing device contains an adjustable tension/force and speed control system, which enables the door to self-close at an adjustable rate of speed.

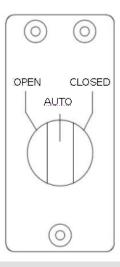

#### Damper

Damper option quietly stops the door when being opened.

The VersaMax Touchless door package with automatic doors eliminates the need to touch a door for opening and closing. The door package provides the ultimate in convenience and infection control for ICU, CCU, isolation rooms and other interior sliding door applications. The design takes the current manual VersaMax product and adds your choice of jamb or wall mounted activation devices. This allows the customer to have the same door components listed above on all automatic and manual VersaMax products.

For more details, please reference 1016379 VersaMax Touchless Addendum manual.

### **Program Selector**

### **Program Selector Functions**

**CLOSED** 

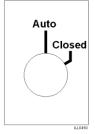

The inner and outer activation units are disconnected. The door can be opened with an emergency pushbutton/key switch (if installed).

**AUTO** 

Two-way traffic, normal operation of the door. The door can be opened with the inner and outer activation units.

**OPEN** 

The door is permanently held open. (This function is only available if door is tied into building's fire alarm.)

#### Note!

If the door package has smoke seals and the controller is not connected to the building fire alarm, the 'Open' function will be disabled. For these cases, a decal is added to the switch for correct function selector.
