# Sliding Door ASSA ABLOY SL500 CGL

# Your Stylish Entryway Awaits

## Alluring. Inviting. Adaptable.

When you're looking to create a captivating and inviting entryway, look to the ASSA ABLOY SL500 CGL. The ASSA ABLOY SL500 CGL offers the same benefits as the powerful ASSA ABLOY SL500 standard sliding door, with the added benefits of an attractive all glass door.

Let your imagination soar to create an entrance of great distinction, elegance and grandeur. Available in single slide or bi-part, suitable for both interior and exterior applications in Fixed Sidelite (FSL) and Full Breakout (FBO), with an array of widths and sizes, the ASSA ABLOY SL500 CGL is adaptable and flexible for your unique door opening and needs.

## Stunning aesthetics. Great performance.

The ASSA ABLOY SL500 CGL provides sleek styling with an unobstructed view to your entryway to create a spectacular facade. Enhance the aesthetics of your package by choosing between a painted or clad finish, or incorporate your corporate logo onto the glass via decal or etching.

The ASSA ABLOY SL500 CGL features the same powerful operator found in the standard ASSA ABLOY SL500 sliding door system. Its rugged design features 4" anti-riser derailment guides and robust carriage wheels for superior performance. The dazzling aesthetics extend right up to the door header, with a sleek, tapered header design that sits flush mounted to both the interior and exterior for seamless integration.

Choose the bottom rail that suits your needs and design requirements.

### **Fixed Sidelite**

available with 4", 7", and 10" bottom rail height

### **Full Breakout**

available with 4" bottom rail height

## Smart features designed for performance and serviceability

The ASSA ABLOY SL500 CGL features an array of energy savings features including a low energy consumption operator, separate time delays for sensors and key access, and magnetic catches (standard on full breakout, optional on fixed sidelite) to close and prevent inadvertent breakout. The door system and package features the ease of service you have come to expect from ASSA ABLOY products. This includes inconspicuous bottom rail mechanical locks and a bottom foot guide - all adjustable without removing the door. Other serviceability features include a removable service cover, as well as fail safe sensor monitoring.

### ASSA ABLOY SL500 CGL Features
